**Subject:** Shannon Peatross--Rock-It Stone

I received a voice message from Bob Pinder who is developing some land across the road from the Strawberry River Quarry in Duchesne county. Rock-It Stone has been placing some of their waste rock in a berm on Mr. Pinder's property, and the area across the road is not part of the permitted area for the mine. Mr. Pinder said, however, that he has hired Rock-It Stone to build this berm. Therefore, the berm should be considered an end use of the mine product and not waste disposal that needs to be permitted.

Could you please print this for the file? Thank you.
